The Tiny Wooden House:

Visitors will be amazed to find a well appointed kitchen finished with granite worktops, a fold away dining table that seats five, a living room with wood burner and two sofa beds, separate shower and toilet and two staircases leading to the bedrooms and the Hot Tub.... all on the ground floor!

At one end of the living area a spiral staircase leads to a landing from which guests can access the Hot Tub via a doorway, or access the Master Sleeping Loft with King Size double bed.

Beneath the landing is a full size fridge adjacent to the fully equipped kitchen which offers sink and twin hob.

At the opposite end of the living area a fold down staircase leads to a landing that provides access to a second sleeping loft with three single beds.

Adjacent to the landing is doorway into Shower, WC and basin with private changing area.

The House sleeps 5 + 3. The Twin Sofa Bed is used to make two singles or one 3/4 double and a chair bed pulls out to make another single.

The unique experience does not end inside the hut:

A South African styled Gazebo (or stoep) features an indoor wood fired BBQ (or Braai) which doubles up as an open wood burner. As evening temperatures dip, the day can be extended sat alongside the roaring fire.

The Wood Fired Hot Tub provides solace whatever the weather.

The warm steaming water and crackling log fire are attractive come rain or shine, summer or winter.

The TinyWooden Hut comprises all the same features as the House, with the following exceptions: The upstairs sleeping loft has two single beds not three.

The single sofa bed is omitted. The bathroom is smaller and the changing area is created with a privacy curtain. The living area is slightly smaller.

Tiny wooden homes are built on a modular chassis which is liftable by crane. The chassis can be supplied with drawer bar assembly and wheels suitable for movement around the campsite. The chassis can also be extended so the HotTub fits on the drawer bar and the entire unit moves as one. This means the homes can be readily moved off site by 4*4 at the end of the season to comply with Planning restrictions, or simply for security.

The Homes are Compliant with Certified Site rules that state that Glamping pods must be moved every 28 days.

TinyWoodHomes has a proven concept for miniature holiday homes that are unique within the British Glamping Industry.

Inspired by a desire to create petite architecture, each Tiny Wooden House offers all the comforts, proportions and appointments of a two bedroom house, all within a truly tiny footprint.

TWH has pioneered a new dimension to the Glamping market, a notion that luxurious and comfortable living can be brought to the campsite, which will attract a high rental premium from a new demographic of discerning customer, all within a realistic budget for the owner.

Tiny wooden houses are designed to be fully portable, and comply with the dimensional definition of a caravan, thus do not require Full Planning permission.

Ideal alongside existing Farmhouse B&B, Farm Holiday Cottage enterprise or Registered/Certified Campsite. (note: can form part of a Camping and Caravanning 'CS' site by approval.)

TWH design and finish each unit to your own bespoke specification and budget. Accompany your Tiny Wooden Home with a wood fired hot tub and/or Wooden Gazebo with Wood Oven to create an all inclusive and very much exclusive holiday unit.

The TinyWooden House is available in two sizes: The Hut (16ft sleeps 6) or The House (20ft sleeps 8.)
